ArcGIS Collector and Survey123

How to Open ArcGIS Online

Overview

Summary

Below are step-by-step instructions for downloading, signing-in, and launching the ArcGIS Online app.

1. If needed, download Collector App by searching ESRI Collector in the App Store.

System Requirements:

Android

- Android 4.2 (Jelly Bean) or later
- Processor: ARMv7 or later, or x86
- OpenGL ES 2.0 support
- Precise location (GPS and network-based) support

iOS

- iOS 8 or later
- iPhone, iPad, iPod touch

2. Start Collector App and sign in to ArcGIS Online.

Select ArcGIS Online

Sign-in

Commented [LS1]: Specific login info?

How to Open Survey123

Overview

Summary

Below are step-by-step instructions for downloading, signing-in, and launching the Survey123 app.

1. If needed, download the Survey123 App by searching Survey123 in the AppStore.

System Requirements:

Android

- Android 4.2 (Jelly Bean) or later
- Processor: ARMv7 or later, or x86
- OpenGL ES 2.0 support
- Precise location (GPS and network-based) support

iOS

- iOS 8 or later
- iPhone, iPad, iPod touch

2. Start the Survey123 App and sign in

3. Select Pipe Inspection Form

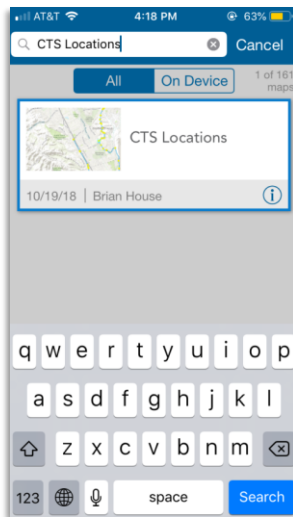

- Note: Surveys are device specific.

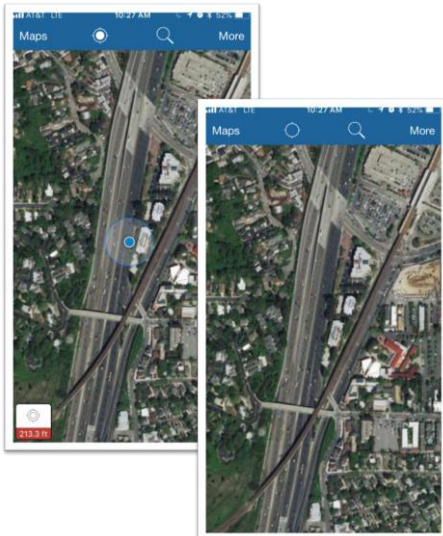

How to Open CTS Locations Map

Overview

1. Search and open CTS Locations

2. The map will open and center on your location.

GPS On

When the 'Current Location' icon is highlighted white, the GPS finder is on.

GPS Off

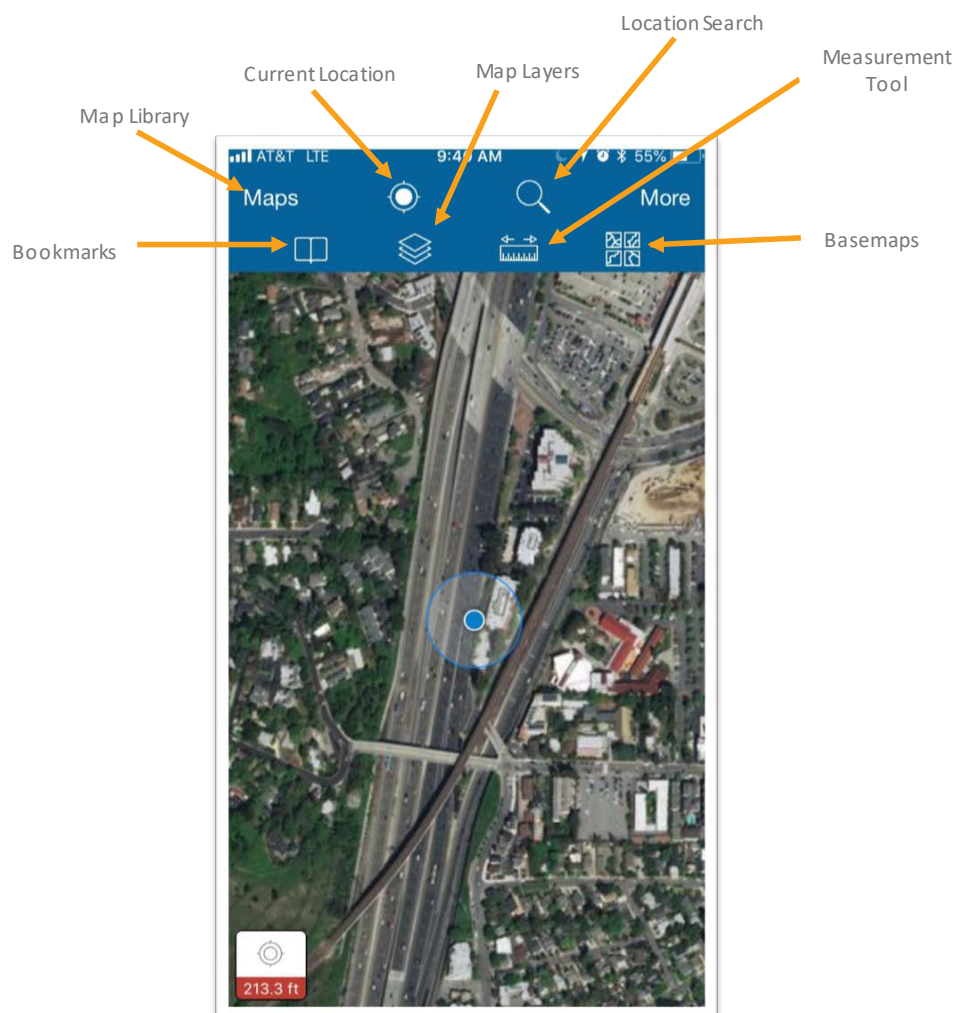

When the icon is not highlighted white, the GPS tracker is off.

Home Screen Menu

Overview

Summary

This is an overview of the ArcGIS Online for mobile interface.

Home Screen Menu

Overview

	MapLibrary	Navigates users back to the Map Library
	Current Location	Center map on your current location
	Bookmarks	Access your bookmarks
	MapLayers	Access Map Layers List
	LocationSearch	Search for addresses and locations
	Measuring Tool	Access Measurement Toolkit
	Basemaps	Access to Basemap Library
	Add a feature	Create new point, polygon, or line
	Accuracy Integration	Horizontal and Vertical Accuracy

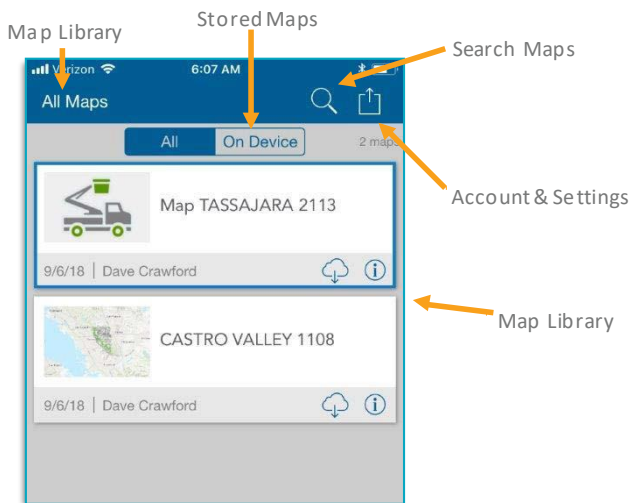

Map Library

Overview

Summary

This is where all your maps are stored. You'll have the option to store the map on your device.

Map Library Toolbar

All Maps

Navigates users back to the MapLibrary

Toggle between Cloud-Based and On Device

Search Maps

Search through MapLibrary

Download to Device

Store Maps on Device for 'offline use'

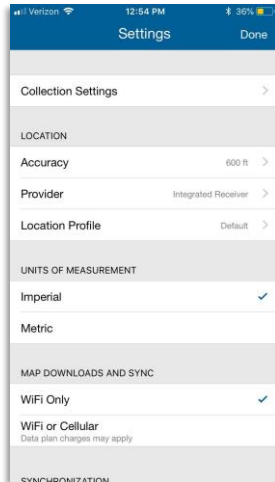

Map Details

View map and survey details

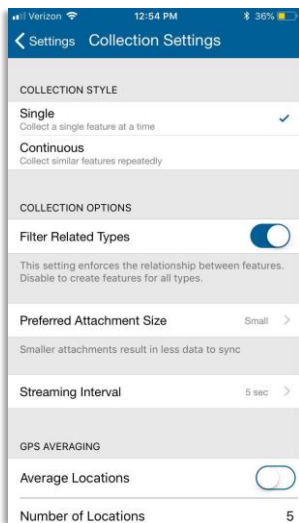

Map Library

Overview

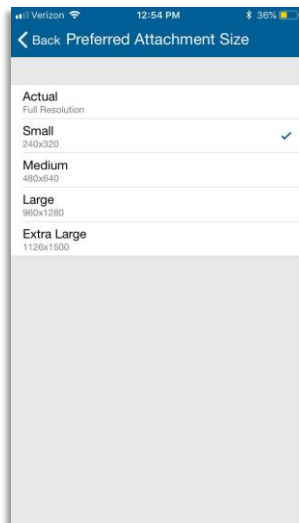

- Attachments should be saved as a `small` file type.
- Syncing of offline data should be available via wifi or cellular data.
- These can be configured in settings on the homescreen.
- Open Settings and click on Collection Settings.

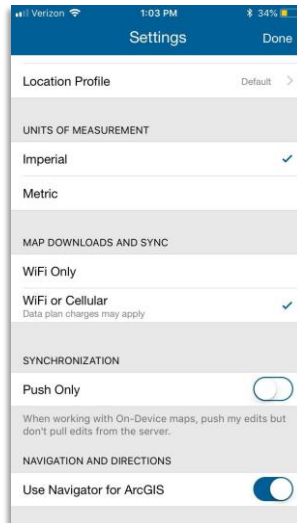

Commented [LS2]: Do we want to go this small?

Open Preferred Attachment Size

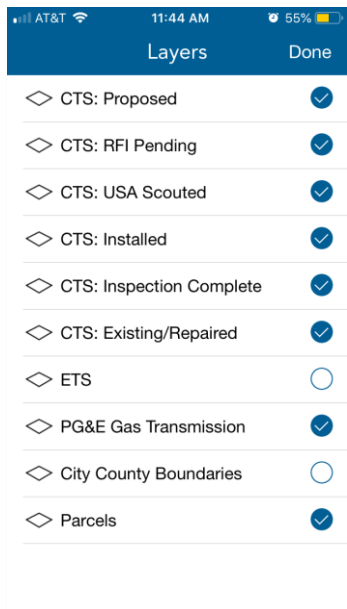

Choose small attachment size.

Choose Wifi or Cellular for Syncing

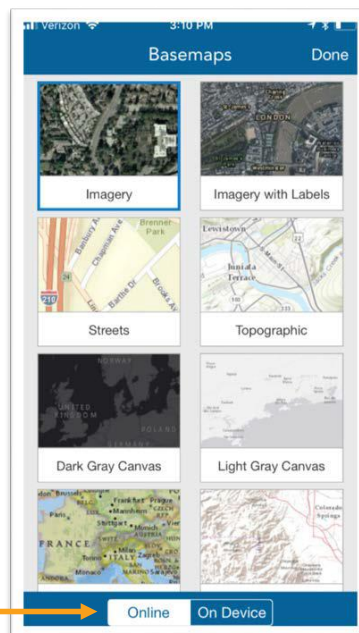

Map Layers and Basemaps

Overview

The available layers to view are CTS: Proposed, CTS: RFI Pending, CTS: USA Scouted, CTS: Installed, CTS: Inspection Complete, CTS: Existing/Repaired, ETS, PG&E Gas Transmission, City County Boundaries, and Parcels. If the blue circle to the left of the layer option is checked and blue, the layer is turned-on and will appear on the map.

If connected to WIFI or mobile data (not working 'On Device') you can access any ESRI basemap at any time. While connected to WIFI or mobile data, you can store basemaps to be used when working 'On Device'. This is where you can change the display type of the map that appears on your screen.

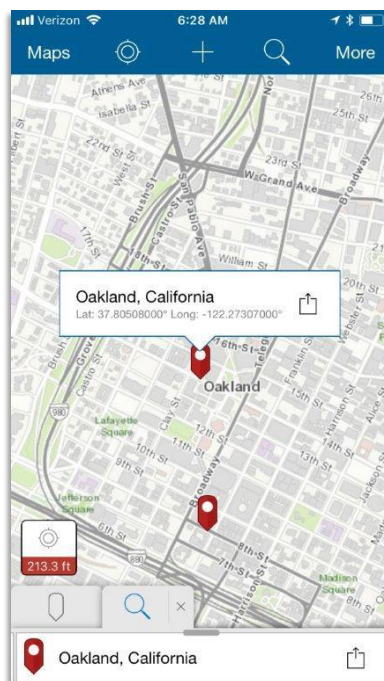

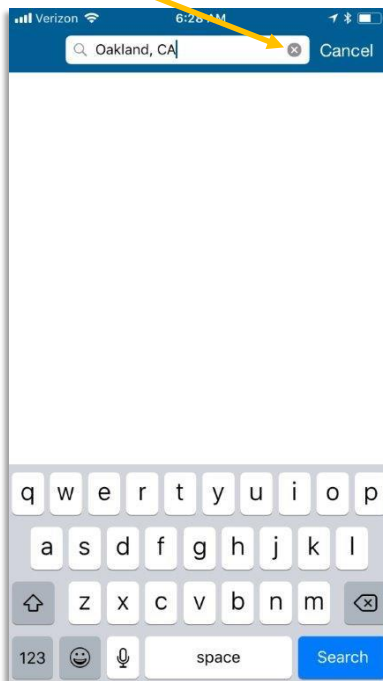

Location Search

Overview

Summary

This is where you can search for places, addresses, or specific CTS locations. Once you enter the place or address you would like to locate, the map will adjust accordingly. The search can be removed by selecting the 'x' mark within the search bar.

Upload and Sync Offline Maps

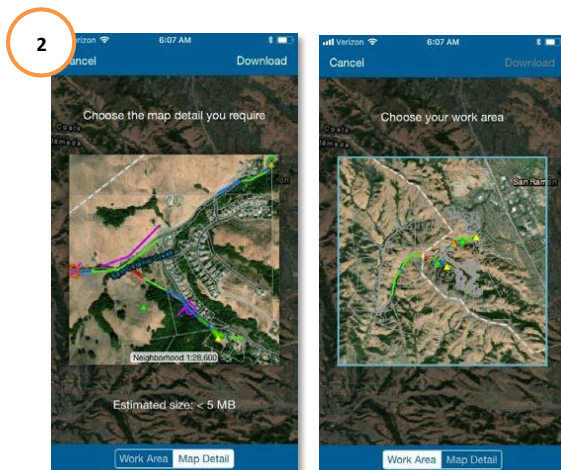

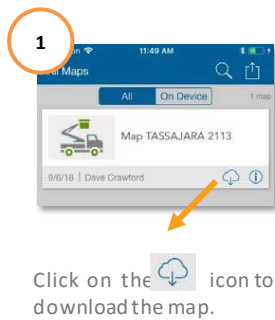

ArcGIS Collector

Upload/Sync Offline Maps

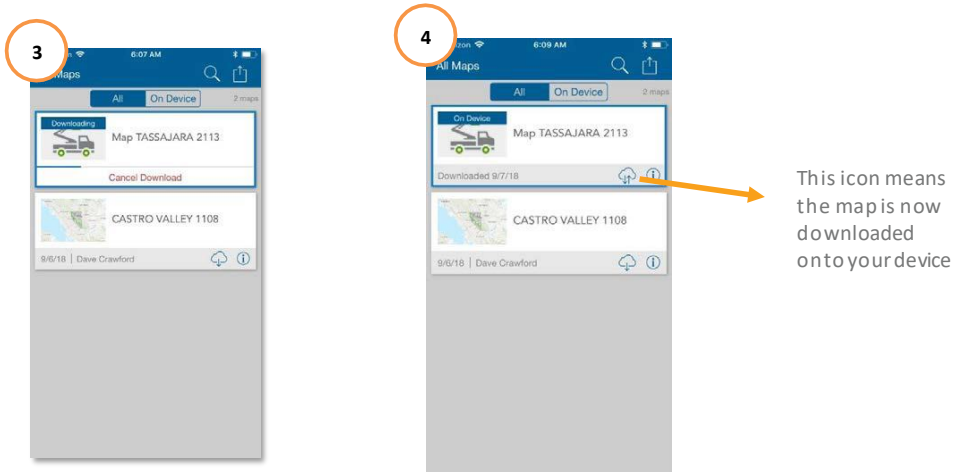

Summary

If you are working in a remote area with limited cellular service, you can download a map to work offline to work 'On Device'. If offline or working 'On Device', after you have re-established cellular service, you will need to go back to the 'Maps' menu under 'On Device' and click the up/down cloud icon with the red number (indicating the number of features that have not been uploaded to ArcGIS Online) and select the cloud to submit and sync these features to ArcGIS Online. This requires cellular data or WIFI connection.

Downloading a map for offline use

Upload/Sync Offline Maps

Syncing your offline activity

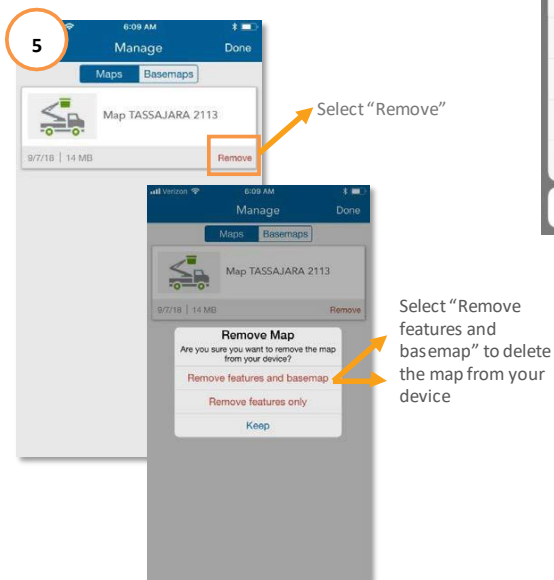

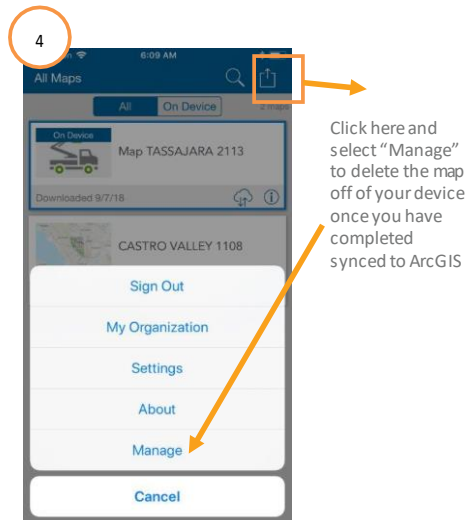

If you are working offline or 'On Device', be sure to sync your data once you have re-established either cellular service or have a WiFi connection. Once you have finished syncing all your offline maps, you can delete the saved maps from your device.

Upload/Sync Offline Maps

If you are working online, connected to ArcGIS Online with WiFi or cellular data, you do not need to sync because it is done every time you select submit.

NOTE: DO NOT REMOVE DOWNLOADED MAP UNTIL ALL DATA IS UPDATED AND SENT IN SURVEY123.

Collecting Data

ArcGIS Collector

Symbols

Legend

Summary

Below are the meanings of the symbols and colors that are seen throughout the map as you input the information for each layer.

- Legend
- CTS: Proposed
- CTS: RFI Pending
- CTS: USA Scouted
- CTS: Installed
- CTS: Inspection Complete
- CTS: Existing/Repaired
- ETS
- PG&E Gas Transmission
- City County Boundaries
- Parcels

Editing Data

Map Layers

1. Search for specific CTS Location

Pin Icon

Results Action Icon

2. Select the Pin icon to identify the specific CTS location That needs to be edited

3. Select the Results Action icon and select edit

4. Fill out all the pertinent data within collector before going into Survey123

Editing Data

Map Layers

5. If a CTS location is incorrect and needs to be moved:

- Select map icon (this will highlight the CTS point)
- Hold finger down on the screen in order to move the CTS location to the correct area

Map Icon

6. Select the camera button to take a photo

7. Select add, take photo (do not choose from library), click on photo and rename, and select done

Camera Button

Inspectors Only - Collecting Data

Survey123

Inspectors Only - Collecting Data Survey123

1. Within Collector, select Pin Icon and select Specific CTS Location to bring up the Details page.

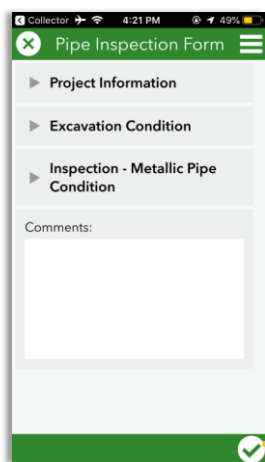

2. Select Pipe Inspection Form hyperlink from the Details page to open Survey123

3. Fill out all information. There shouldn't be any blank fields.

4. Select checkmark when complete.

Checkmark

Inspectors Only - Sending Data (online)

Survey 123

1. Select 'Send Now'

The screenshot shows a mobile application interface for 'Pipe Inspection Form'. At the top, the status bar indicates 'Collector', signal strength, Wi-Fi, time '4:15 PM', and battery level '64%'. The app header is green with a close button (X) and the title 'Pipe Inspection Form'. Below the header, the 'Pipe Type:' section has two checkboxes: 'Metallic' and 'Plastic'. A modal dialog box is centered on the screen with a green checkmark icon. The dialog text reads: 'Survey Completed', 'Your device is online', and 'Would you like to send the survey now?'. There are three green buttons in the dialog: 'Send Later', 'Send Now' (which is bolded), and 'Continue this survey'. A green bar at the bottom of the screen contains a white checkmark icon.

Inspectors Only- Sending Data (offline)

Survey 123

1. Select 'Send Later'

2. Once you're back in service, go to My Surveys and select Pipe Inspection Form. There should be a '1' in the corner.

3. Select Outbox

4. Select Send

General Workflow

General Workflow

1. Crews will use the web map titled “CTS Locations” to collect data. If the work site is in a location outside of cellular service, the map area must be downloaded to a device prior to being offline.
2. Within the “CTS Locations” web map, crew will navigate to appropriate CTS data point and begin collecting data
 - All editable fields should be collected
3. If RFI is needed, the crew sets status of point to “RFI Pending” and moves the location of the point to where the actual install will take place
4. Record the reason for the RFI in comment section
5. Construction Manager will assess the “RFI Pending” point and change the status to “Proposed” once it is approved on the Shovel Ready Report
6. Crew will collect the following photos and attach to the point data in collector
 - **Pre-construction:** This will be a picture of the site before any disturbance has occurred
 - **TOP prep:** this will be a picture of the site before any disturbance has occurred
 - **Cad-weld or Pin Braze:** this label will depend on which applications were used and self-explanatory.
 - **Handicap or Hot wax:** this label will depend on which application was used and self-explanatory.
 - **AC measurement**
 - **DC measurement**
 - **CTS Terminated:** this is a picture of the wires terminated in the post head
 - **Restoration:** this is a picture of the area restored and completed
 - **Pre-dig**
 - **Project documents:** (Optional) any other documents that may be pertinent to the install JSA, Hot work, excavation report, Asbestos chain of custody, coating report if Hot wax was used, etc.
7. Inspector will use the web map titled “CTS Locations – Inspector” to collect data and access the pipe inspection form.
 - Within this map, the inspector will fill out the “Inspector Name” and “Inspection Complete” fields
8. Inspector will follow “Pipe Inspection Form” hyperlink to fill out/submit the Survey123 Form
